Project Overview

The Midtown Medical Center Bikeway will enhance connectivity and create safer connections for people walking and biking through the area.

The project includes:

- 0.75-mile bikeway connecting Saddle Creek Road, the UNMC campus, and the Field Club Trail near 39th Street and Leavenworth Street.
- New pedestrian bridges over Leavenworth Street and Saddle Creek Road.

Project Improvements

Strengthening bicycle and pedestrian connections through new bridges and improved multimodal facilities.

Creating safer travel conditions with two pedestrian bridges over major roadways and wider bicycle and pedestrian dedicated paths.

Expanding accessibility with upgraded sidewalks and ADA-compliant features.

Potential Construction Impacts

- Minimal impacts to privately-owned properties are anticipated.
- Temporary traffic restrictions and trail detours may be needed during construction.
- Temporary nighttime closures to roads while bridges are lifted into place.
- Access to adjacent properties would remain open during construction.
- Temporary access restrictions to driveways are expected during construction of the new trail/ multi-use path.

Potential Construction Impacts to the Trail

Impacts to the Field Club Trail between Marcy and Leavenworth streets are expected:

- Temporary detours
- Temporary closure
- Minor reconstruction to connect to the new bridge
